ABDULRAZZAQ SHEWIA

Melvindale, MI | (313) 999-6927 | abdulrazzaq.shewia@gmail.com | LinkedIn | GitHub | Portfolio

EDUCATION

The University of Michigan-Dearborn Dearborn, MI

Bachelor of Science in Computer Science | GPA: 3.76 | Expected Graduation: Dec 2027

TECHNICAL SKILLS

- **Cloud & Security:** AWS Cloud Technical Essentials, Cloud Security Concepts (CCSK v5), Secure Software (LFD121), Network Security, Identity & Access Control.
- **Programming & Scripting:** C++, Python, C#, Java, JavaScript, Assembly (x86), HTML/CSS.
- **Systems & Tools:** Linux/Unix, Windows OS, Git/GitHub, VS Code, Visual Studio.

PROFESSIONAL CERTIFICATIONS

- **Certificate of Cloud Security Knowledge (CCSK v5)** – Cloud Security Alliance | Jun 2026
- **AWS Certified Cloud Practitioner** — In Progress (Expected Completion: October 2026)
- **AWS Cloud Technical Essentials** – Amazon Web Services | Dec 2025
- **Google IT Support Professional Certificate** – Coursera | Jan 2025
- **Google UX Design Professional Certificate** – Coursera | Nov 2024
- **Developing Secure Software (LFD121)** – Linux Foundation | Nov 2024

PROFESSIONAL EXPERIENCE

Amazon *Detroit Metropolitan Area, MI*

Problem Solver | May 2026 – Present

- Perform root-cause analysis and troubleshooting for inventory anomalies, shipment integrity failures, and database discrepancies.
- Utilize internal inventory tracking tools to detect, isolate, and remediate systemic errors across fulfillment channels.
- Enforce standard operating protocols to optimize warehouse workflows and mitigate operational risks.

Quality Auditor | Oct 2025 – Apr 2026

- Audited and verified detailed technical specifications for inventory items being added or modified in the central system.
- Validated, inspected, and approved associate-submitted data entries to guarantee strict data integrity and system accuracy.
- Analyzed operational workflows to identify compliance gaps, reduce entry errors, and maintain database quality standards.

ICQA Associate | Sep 2022 - Sep 2025

- Performed inventory counts and quality audits, investigated discrepancies, and maintained accurate inventory records.
- Used internal systems and handheld scanners to track inventory and resolve location, quantity, and data issues.
- Collaborated with associates and leadership to address recurring errors and support operational accuracy.

TECHNICAL PROJECTS

CampusGear Equipment Checkout System | Python, TCP Sockets, JSON | GitHub *Academic Project*

- Developed a TCP client-server equipment checkout system with server-managed inventory for viewing, checking out, returning, and tracking equipment.
- Designed a JSON-based application protocol with message framing, request validation, structured error handling, and graceful connection handling.

Daleel Mobile Application | Flutter, Dart, Mobile Development | GitHub

- Developed a cross-platform mobile application using Flutter and Dart with a structured, user-friendly interface and reusable application components.
- Implemented application logic, input handling, and mobile UI functionality while maintaining an organized project architecture.

Developing Secure Software & Infrastructure Labs

Academic / Self-Directed

- Applied secure coding practices (OWASP guidelines) to mitigate vulnerabilities like SQL Injection and Buffer Overflows in C++ and Python.
- Configured basic cloud infrastructure and evaluated access control policies to comply with security best practices.
